To Get The Best Out Of Your Tea

- Use fresh filtered water, this takes out some of the elements that can distort the flavour of tea
- Softening your water will give your tea a better colour and reduce scum
- Make sure the water is at the correct temperature

To Get The Best Out Of Your Tea

- Use this leaflet as a guide to the optimum brewing conditions
- All of our oolongs, exotics and many of our green teas are suitable for multiple infusions
- Not all teas require milk or sugar, and doing so may destroy the flavour experience
- If kept away from strong smells, sunlight and moisture tea should keep for up to two years
- The amounts shown are per mug
- Where an x appears it refers to any number in a range so TROx would show that all rooibos teas (all teas starting with the code TR) are brewed the same way.
